

# POCKETSMART AI

Your Smart Budget & Recommendation Assistant

|             |                                 |
|-------------|---------------------------------|
| Document    | 08 – Project Demonstration      |
| Project     | PocketSmart AI                  |
| Prepared By | Ratchana M                      |
| Phase       | Phase 8 – Project Demonstration |

## 1. Project Demonstration Overview

The Project Demonstration phase presents the working PocketSmart AI application and demonstrates the main user workflow, planner modules, recommendation generation, shopping search links, and recommendation history. The demonstration is intended to show how the completed system works from user interaction to generated results.

## 2. Demonstration Sequence

| Step | Demonstration Activity                                            |
|------|-------------------------------------------------------------------|
| 1    | Open the PocketSmart AI application.                              |
| 2    | Register a new user or open the Login page.                       |
| 3    | Login using valid user credentials.                               |
| 4    | Open the Dashboard.                                               |
| 5    | Select Home Planner, Party Planner, or Jewelry Planner.           |
| 6    | Enter the required budget and preferences.                        |
| 7    | Submit the planner and generate a recommendation.                 |
| 8    | View the recommendation and budget allocation.                    |
| 9    | Open the available shopping search links.                         |
| 10   | Open History to view saved recommendations.                       |
| 11   | Show the application backend/database interaction where required. |
| 12   | Logout from the application.                                      |

## 3. Main Features Demonstrated

- User Registration and Login
- Dashboard with three planner modules
- Home Planner
- Party Planner
- Jewelry Planner
- Budget-based recommendation generation
- Gemini AI integration when configured

- Rule-based fallback recommendation
- Shopping search links
- Recommendation History
- Logout and session handling

## 4. Demonstration Evidence

The following screenshots show the working application interface and major user-facing features.

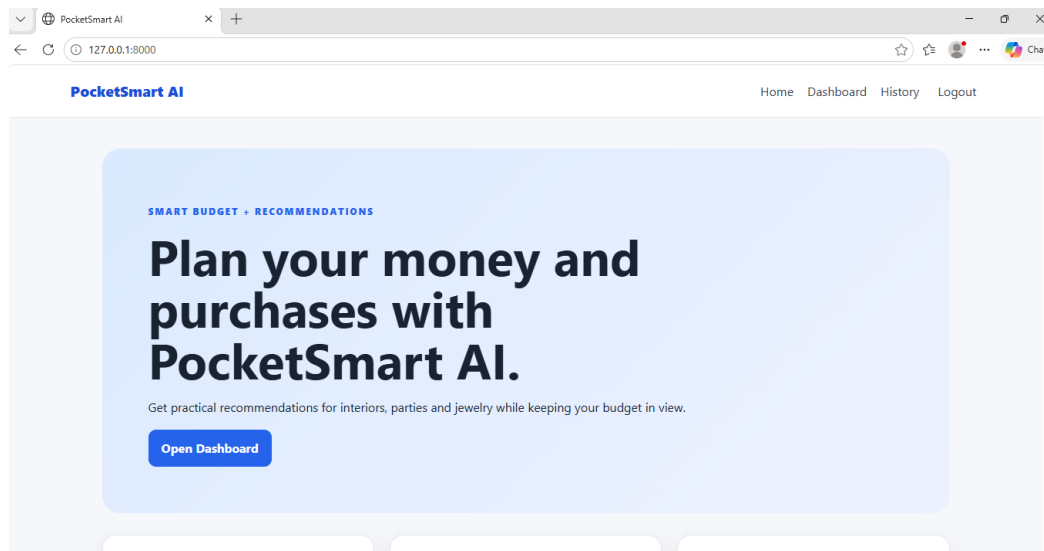

Figure 1. PocketSmart AI Home Page

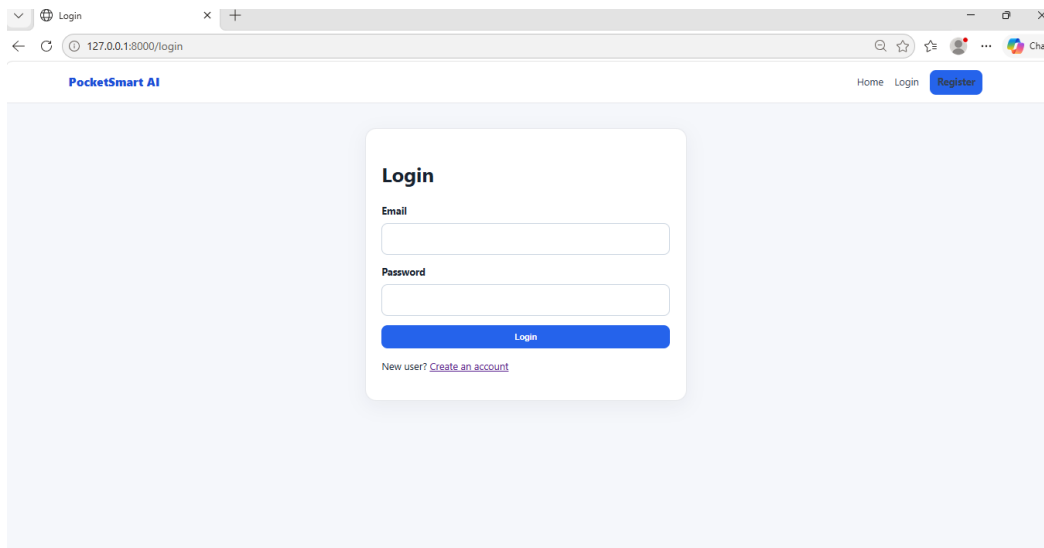

Figure 2. Login Page

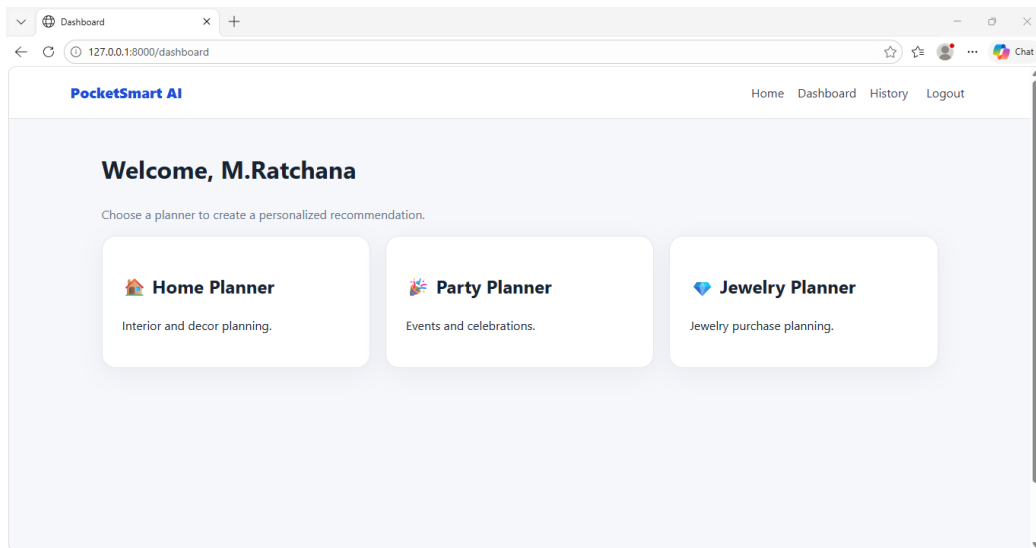

Figure 3. Dashboard with Home, Party and Jewelry Planners

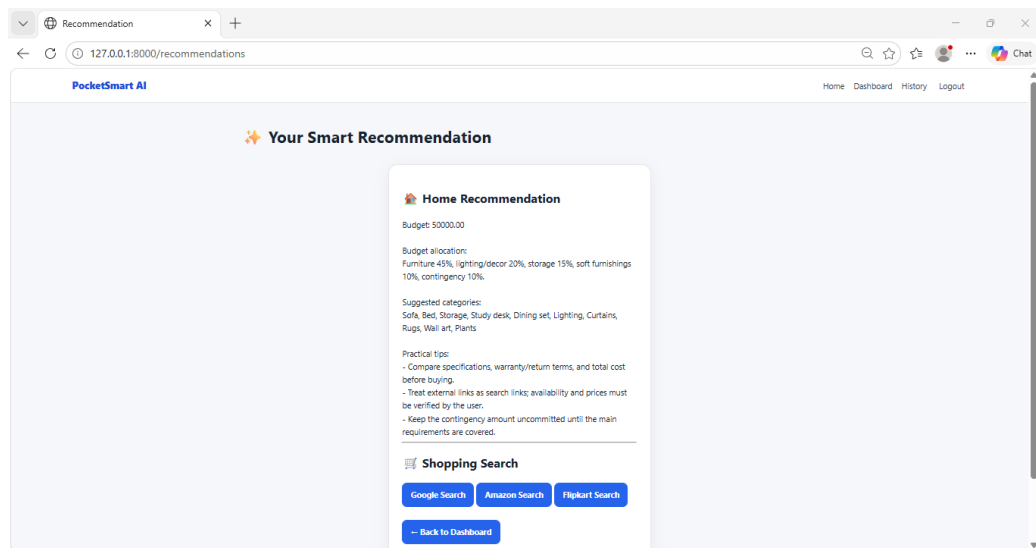

Figure 4. Recommendation Result with Shopping Search Links

## 5. Working Demonstration Scenarios

**Home Planner:** A ■50,000 budget was used to verify home planning and recommendation generation.

**Party Planner:** A ■50,000 budget was tested with Birthday, 50 guests, Hall, Blue, Vegetarian and Simple preferences.

**Jewelry Planner:** A ■25,000 budget was tested with Ring, Wedding, Gold, Simple and Women preferences.

## 6. GitHub Repository

The project source code is maintained in the PocketSmart AI GitHub repository:

[https://github.com/ratchana112007/POCKETSMART\\_AI](https://github.com/ratchana112007/POCKETSMART_AI)

## 7. Demonstration Materials

The Phase 8 submission can contain the working application, GitHub repository, application screenshots, demonstration video, and project presentation/PPT. The screenshots included in this document provide visual evidence of the current application workflow.

## 8. Presentation / Demo Talking Points

During the live demonstration, explain the project problem, objective, technology stack, authentication flow, planner modules, budget inputs, recommendation process, shopping search links, history functionality, and the role of the backend/database. Finally, show logout and briefly summarize the project outcome.

## 9. Phase 8 Conclusion

The Project Demonstration phase provides evidence of the working PocketSmart AI application through the user workflow, functional scenarios, GitHub repository, and application screenshots. It brings together the completed project work for final presentation and demonstration.

**Final note:** A demo video and presentation/PPT can be attached separately when they are prepared.
